

# MPDS Configuration Sheet

## Microsoft Internet Explorer

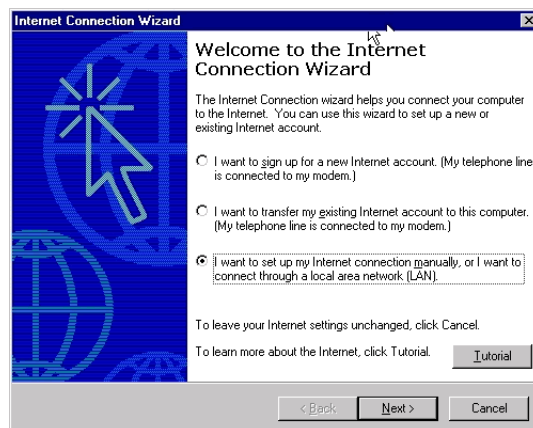

### Pre-requisites:

That the MPDS terminal is already connected to the Internet as described in previous configuration documents and that you have Microsoft Internet Explorer version 5.0 or later installed.

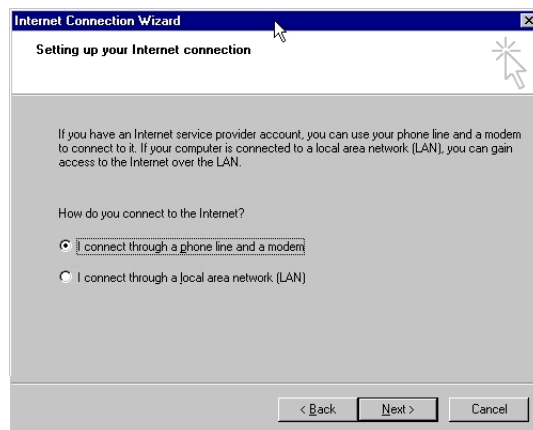

### Note

When running Internet explorer for the first time, the Internet connection wizard will attempt to connect the machine to the Internet. Should you have already set up an MPDS Internet connection go to the section on optimising.

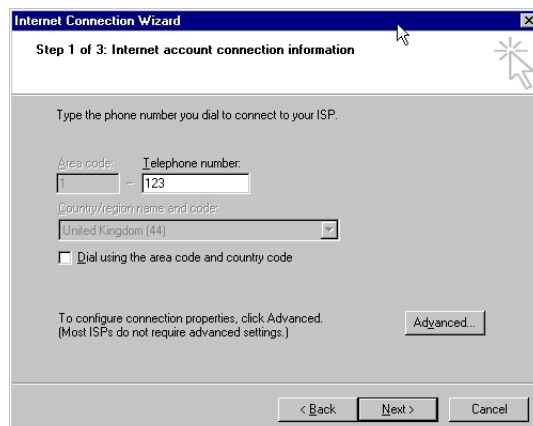

1. At the welcome screen select the option “I want to set up my Internet connection manually, or I want to connect through a local area network (LAN)”, then click <Next>.

2. Select “I connect through a phone line and a modem” then click <Next>.

3. Enter the MPDS telephone number in the “Telephone number” field. This is usually 123 and un-tick the “Dial using area code and country code” and click <Next>.

## Microsoft Internet Explorer

4. Enter the User Name and Password as supplied by your service provider (LESO) in the correct field and click <Next>.

5. In the "Connection name" field, Give the connection a meaningful name, e.g. 'MPDS' and click <Next>.

6. The next screen starts to set up the Internet mail account. This is covered in another integration sheet, so select "No" and click <Next>.

## Microsoft Internet Explorer

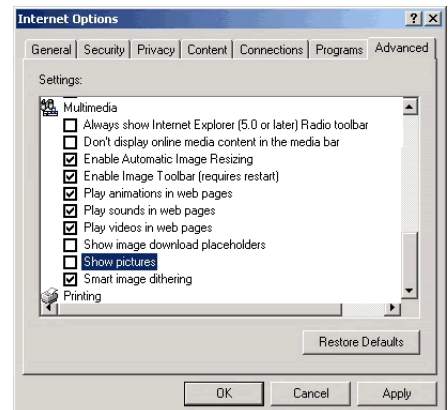

7. Un-tick the “To connect to the Internet immediately, select this box and click <Finish>.”

## Optimising

- a. Using the Internet explorer icon on the desktop, right click and select “Properties”
- Select the “Advanced” tab and un-tick:
- o “Automatically check for Internet Explorer updates”
  - o “Disable script debugging”
  - o “Enable Install on demand (Internet Explorer)”
  - o “Enable install on demand (other)”
  - o “Show pictures”.

- b. Click <Apply> and <OK> to return to Internet Explorer. Internet Explorer is now ready to use over MPDS.
