SATCOM: Could this be your most valuable asset yet?

The cost of Satcom is less than $2 per flight hour, equivalent to 30 seconds of taxi-out fuel burn. This means airlines can benefit significantly from Satcom, improving efficiency and safety, saving airlines more money.

**Airport Departure Charge**: $2,704

**Fuel**: $14,000

**Food & Beverage**: $964

**Satcom**: $3-15

**Airspace Usage**: $1,086

**Without Satcom**: 200 transatlantic flights per day

**With Satcom**: 2,000 transatlantic flights per day

**With Satcom**, Satcom will help power the re-emergence of a thriving air transport industry with endless new possibilities that increase operational efficiency and agility, saving airlines more money.

Satcom increases airspace capacity, making it more efficient, sustainable, and effective. With Satcom, airlines can fly longer routes and save fuel, benefiting the environment and the bottom line.

**IP-Enabled Satcom Results**: 1% fuel reduction per flight annually, saving 3.39 billion litres of fuel, 8.3 million tonnes of CO₂, and $1.6 billion in fuel costs.

**Satcom Industry Savings**: 2001-2016

**Without Satcom**: $1.1 billion

**With Satcom**: $1.9 billion

Find out how we can help you make the most of the new opportunities Satcom has to offer.
