REMOTE

CONNECTIVITY

BGAN LINK

FIXED BROADBAND DATA FOR REMOTE REGIONAL LOCATIONS

BGAN LINK

Whether you are a construction unit building a dam in a remote location, or a community health project in a rural and isolated community, communications for remote teams has always been a challenge. Cellular and terrestrial networks don't always extend to where your teams need to operate. Even when they do, these networks can become congested or damaged.

With our reliable, affordable BGAN Link service, we are taking this headache away. Powered by our global L-band satellite network, BGAN Link offers 99.9% availability, giving you dependable, always-on connectivity, whenever and wherever your project requires it. The service is offered on an all-you-can eat basis, with one monthly fee, making it easier than ever to budget for your communications requirements.

By choosing BGAN Link you can provide your remote teams with affordable, reliable broadband connectivity, no matter where the mission takes them. The service enables your teams working in remote areas to quickly and easily set up a remote office. Once connected,

the project gains instant access to standard workplace tools, such as email, web browsing and VPN, as well as collaboration tools like VoIP or video conferencing, so your teams can remain productive and you can progress the project together in real time.

BGAN Link is accessed through discreet plug and play terminals. They are quick and easy to set up with no technical expertise needed, and a broadband connection is established within minutes. The terminals' power consumption is low and batteries, if used, are easy to recharge using solar panels.

AFFORDABLE CONNECTIVITY

Available in fixed monthly subscriptions, BGAN Link gives you full visibility and control of your budget. BGAN Link is available in either 3 or 12-month subscription periods, and both come with 2.5, 5, 10 or 30GB of data to use each month. Once the data limit is reached, speeds will be capped at a lower rate until the start of the next month's allowance.

HOW TO BUY

Through a range of partners in more than 80 countries around the world.

To give you further flexibility, with the 30GB allowance, you can arrange for the cap to operate daily, so that your allowance accrues across the month, or monthly, meaning you can use your entire month's allowance in a shorter period.

BGAN Link is only offered in selected geographical regions – see the map below for more information. Globally (outside or within the supported regions) we offer the BGAN Standard + plan which offers a similar allowance but with even more flexibility as well as the Flex plans allowing you to also cap your spend.

MOBILE PROJECTS

Whilst BGAN Link is designed for sustained use in one location, we understand that projects move and change over time, so we offer the facility to move your BGAN Link service country-wide as you see fit.

FEATURES

BGAN Link offers a competitive alternative to fixed satellite options like Ku-band VSAT:

- Reliable broadband internet with speeds of up to 492kbps
- Available in 3 or 12 monthly subscriptions
- All our plans come with in-country mobility, allowing you to move around as your operations see fit
- All our BGAN terminals can be used with BGAN Link
- Fair use policy applies to all users

BGAN LINK COVERAGE

This map is for general purposes only and guarantee is given of accuracy or fitness for a particular use. Coverage is subject to change at any time.

The BGAN Link plans are available in Eastern Europe – Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Mongolia, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. LatAm – South American region including Mexico and Caribbean Islands excluding Cuba. North America - Canada only. MENA - all African and Middle Eastern countries excluding Somalia, Sudan, Iran and Syria. APAC – Australia, New Zealand and some Pacific islands. Antarctica - highlighted regions only.

NOTE: Customer shall comply with and procure that its Service Providers comply with all government export controls (including US International Arms Regulations, US Export Administration Regulations and UK Export Controls), sanctions, embargoes and trade restrictions that are applicable to the Products and use of Satellite Terminals.
