BGAN SERVICE PLAN

GLOBAL L-BAND
BROADBAND GLOBAL AREA NETWORK
Our Service Aware Control and Charging system analyses usage and adjusts speed/availability if terminal exceeds prescribed volume allowance periods of performance reduction as the network manages the satellite resources.

Quality of Service (QoS) is an advanced network feature that prioritises internet traffic. The BGAN network operates on a dynamic basis, providing resources on demand, as such, low priority users may experience short

These services include a monetary allowance to spend on usage at the MB data rate stated in the plan

Inmarsat reserves the right to discontinue or amend any service at any time for any reason and without giving any notice. You have a requirement for high monthly volumes of standard IP data in specific countries for a sustained period of time.

You need to address specific regions, i.e. China, Russia and South America. Small MRC and preferred rates in region vs. out of region. This is to compete directly in these countries with competition and to support lower propensity to pay

You need to support customer with Global or geographic needs (in China, Southern Africa and South America) who rather prepay their airtime and buy vouchers as they see fit

While the information in this document has been prepared in good faith, no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability (however arising) is or will be accepted by the Inmarsat group or any of its officers, employees or agents in relation to the adequacy, accuracy, completeness, reasonableness or fitness for purpose of the information in this document. All and any such responsibility and liability is expressly disclaimed and excluded to

For you if...

- You need an always-on terminal at a minimum fee and need to use very low volume of inclusive data for a specific period of time.
- You use case is mission critical, you care about network priority and you need high volumes of inclusive data for a specific period of time.
