

□ FLEET REACH

Supercharged connectivity in ports and coastal areas optimised by Fleet Xpress

Fleet Reach integrates terrestrial mobile technology into your Fleet Xpress suite of services. Fleet Reach seamlessly switches connectivity technology enabling faster speeds, increased signal strength, lower latency, and improved reliability.

FLEET REACH

Supercharged connectivity in ports and coastal areas optimised by Fleet Xpress

POWER OF MULTIPLE NETWORKS

The average vessel spends up to 40% of its time in port or coastal areas, therefore it's important to always have the best possible connection. But in these congested, built-up areas with many vessels competing for a connection, that hasn't always been possible.

Fleet Reach changes all that by delivering superior, reliable coastal connectivity.

KEY BENEFITS

Fleet Reach – optimised by **Fleet Xpress** – offers supercharged coastal connectivity thanks to added terrestrial mobile connectivity. This enables faster speeds, increased signal strength, lower latency and more reliable connectivity when sailing near coasts or docked in-port.

Fleet Reach constantly monitors the strength of signals from different sources. Combined with seamless switchover technology, **Fleet Reach** ensures you always have the best possible connection – without any impact on service. This means that seafarers can enjoy consistent connectivity wherever the vessel is, with the service seamlessly switching between technologies to ensure an always-on connection.

With speeds up to 50 Mbps and an uninterrupted experience, files move faster, and streams can beat buffering. Crews can work and play without having to worry about when their connection might return, so they can be more flexible with how they operate on the coastline. The crew onboard can also monitor the **Fleet Reach** status via Fleet Link Onboard Support Portal.

Fleet Reach is available as in regional and multi-regional packages for global operations, allowing you to capitalise on your time in some of the world's busiest ports and shipping routes.

KEY FEATURES

High-bandwidth, low latency

Global roaming coverage

Single SIM card, one provider and one bill

Seamless switch between LTE and Fleet Xpress networks

Full budget control with allowance-based packages

Multi-packages and regional plans

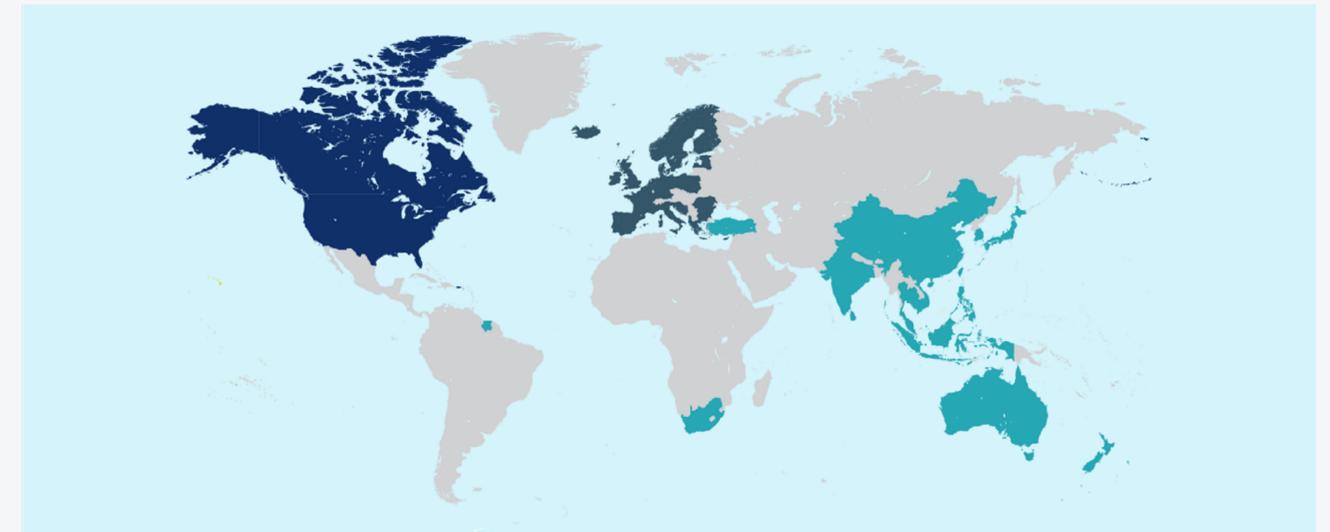

Business applications and crew traffic support

High cyber security standard

OUR COVERAGE

Making sure our customers are never out of touch wherever they are in the world.

Coverage regions key:

NAM

EUROPE

MULTI-REGION

Note: Western Alaska (Aleutian Islands) currently not covered by Fleet Reach
