

Fleet Xpress for OSV

Open up new levels of connectivity and guaranteed performance

Inmarsat's Fleet Xpress service offers Offshore Support Vessels the flexibility to meet changing bandwidth demands.

Fleet Xpress is powering the maritime data revolution by taking maritime communications to the next level and delivering the high data speeds enabled by Inmarsat's Global Xpress Ka-band technology.

To support the fluctuating data demands of OSV vessels and periods of economic uncertainty, Fleet Xpress customers can easily upgrade and downgrade between service levels for free, for the duration of their 12/36 month contract period, or sign-up to a 3 month fixed contract when coming out of lay-up.

In addition, dedicated charterer plans are available when third parties come on-board and have the need for segregated bandwidth.

Extended Flexibility

Flexible Plans – control costs for on-hire and off-hire connectivity between contracts, by switching from high bandwidth to standby without additional charges.

Global High-Speed Connection

Customisable high-speed bandwidth plans offer extensive coverage in oil and gas regions, with speeds of up to 10Mbps (if used in conjunction with enhanced terminal) at the same prices globally.

Continuous Connectivity

Ultimate reliability through a dual satellite constellation using Ka-band with unlimited L-band back-up for unrivalled cost effective out of band service management. A dual antenna solution is available to minimise blockages.

Guaranteed Performance

Committed data rates backed-up by service level agreements ensure customers always get what they pay for.

Cyber Resilience

Increased preparedness for cyber threats at sea.

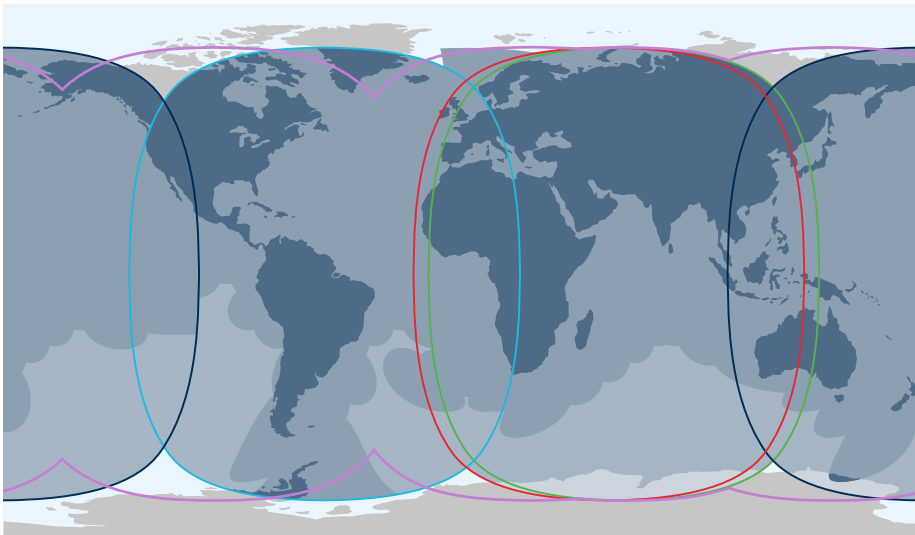

We've extended our installation infrastructure

Due to unprecedented demand, we've expanded our key Fleet Xpress installation ports from 6 to over 30 new locations!

NOTE: These key ports only apply to Fleet Xpress installations and do not represent new ports for upgrades, repairs or annual services.

Coverage

Legend:
 I-5 F2 (blue square) I-5 F4 (red square) I-5 F1 (green square) I-5 F3 (purple square) I-4 and Alphasat coverage (pink square)
 Fleet Xpress network available over at least 99% of this area (dark blue square) Extendable Fleet Xpress coverage via steerable beams (light blue square)

This map is for general information purposes only and should not to be construed or used as a legal description or representation. No guarantee or warranty is given that the map is spatially or temporally accurate or fit for a particular use. Coverage is subject to change at any time. Inmarsat shall have no liability for decisions made or actions taken/not taken in reliance upon the map or for any resulting losses suffered.

Subscription plans

- Plans available for 3 months, 12 months or 36 months
- Eighteen OSV specific plans and eight charterer plans
- Flexible upgrades and downgrades
- No downgrade fees, except in case of 3 month contract
- Up to 180 days to suspend, except in case of 3 month contract where up to 30 days suspension is allowed
- Committed bandwidths range from 8/32 kbps up to 3 Mbps/6 Mbps; with additional plans up to 5 Mbps/10 Mbps available with enhanced terminal

Core components

- Global Xpress antenna and terminal (1m) – dual antenna option available to minimise line of sight blockage. Enhanced terminal available for higher throughputs
- FleetBroadband 250 or 500 antenna and terminal for backup
- Network Service Device

How to buy

Fleet Xpress for OSV is available directly from Inmarsat.
