FLEET ONE
GLOBAL FISHING
Fleet One Global delivers the reassurance of a reliable, simultaneous voice and data connection for business, support services, and staying in touch with family and friends back home — anywhere on the world’s oceans.

In an emergency, Fleet One supports Inmarsat’s free ‘505’ safety service, which directs a call straight through to a Maritime Rescue Co-ordination Centre (MRCC). So you can set sail knowing you are in safe hands.

**Flexible, Reliable, Affordable**

Fleet One Global changes all that. It is simple and cost-effective, giving you 150kbps connectivity at one global rate, either prepaid or postpaid. It’s flexible, allowing you to de-activate and re-activate the service at any time, so you only pay for it when you need it.

Hardware costs have also been kept low to help you manage budget, and the equipment is easy to install, needing no expert know-how.

**Stay Connected, Stay Safe**

Always-on connectivity gives you access to email and critical applications such as real-time electronic charts and weather reporting, wherever you are. Fishing and merchant vessels can transmit regulatory declarations, and save time and money by calling ahead to sell their catch or book in repairs before they get to port.

For seafarers seeking the adventure of longer voyages, Fleet One Global is available from Inmarsat and our partners around the world. Visit our website to find the right choice for you.
