INDIVIDUAL VESSEL MANAGEMENT

Ability to slide bandwidth allocation between operational and crew welfare dependent on mission requirements

➤ FLEET WIDE SATELLITE SERVICE MANAGEMENT

Allows real time monitoring of bandwidth across the fleet:

- Increase and decrease of vessel bandwidth as required across fleet
- Access and monitor throughput
- Independent reallocation of resources and connection of terminals

OPERATIONAL Defence Restricted

Operational Data

Communication link

Network access

Corporate email

Weather forecasts

Mapping information Foreign Port Access

300% increase in bandwidth &

data

70% reduction in throughput escalating operating costs

to family & friends
