StaySafe

StaySafe is a smartphone app and cloud-based monitoring service which provides personal protection for lone workers. The app tracks location in real-time enabling employees to check-in safely and request immediate assistance if necessary.

The StaySafe app, which works on both smartphones and tablets, tracks employee location via GPS which is shown in real-time on a map within the online StaySafe Hub.

StaySafe is a BS8484 accredited smartphone app and cloud based monitoring service which is used to monitor and protect lone workers while they travel and work in the field. StaySafe is in use globally across three continents and across a wide range of sectors.

If an employee activates the app's panic button or fails to check in when expected, alerts are automatically triggered on screen and via email and text. Alerts can be monitored and responded to in house by the employer or clients can opt to outsource the monitoring of employees to one of StaySafe's 24/7 professional response partners.

StaySafe offers unrivalled functionality including a panic button, working session expiry, automatic check-in, low battery warning, two-way audio, GPS tracking, inactivity and duress alerts.

Plus, employees can only be tracked when they self-initiate a session in the app – so they are in control.

Through its Certified Application Partner programme, Inmarsat has certified StaySafe as Inmarsat-ready. If you’re looking to leverage the reliable, global reach of Inmarsat’s award-winning satellite network to monitor, track and protect the safety your workforce, StaySafe is the ideal application.

StaySafe has been certified for use over Inmarsat’s IsatHub and BGAN services, using all BGAN land terminals.

Key benefits

1. All you need is your smartphone or tablet
2. Meets duty of care and adheres to lone worker legislation
3. Employees are in control, providing privacy and peace of mind
4. Professional monitoring and response services are available
5. Flexibility to cover all customer requirements
6. A low cost, scalable and global application suitable for any sector
Features

- Smartphone app compatible with Android, iOS and BlackBerry
- Accurate GPS location tracking
- In-house or professional outsourced monitoring and response service
- Unrivalled functionality, including: session time out, panic button, low battery alert, duress pin and automatic check-in facility
- Cloud-based monitoring Hub

Advantages

- Streamlined system with minimal administration and training
- Simple and uncomplicated multi-office rollout
- Real-time and historical reporting
- Cements you as a responsible, caring employer and is excellent PR
- Helps satisfy your duty of care and conformity with lone worker legislation

Usage scenarios

Anytime an employee works or travels alone or enters a remote location their safety is at risk but with StaySafe, you can help protect them.

StaySafe enables an employer to better meet their duty of care to lone workers by monitoring employee location and safety status. It also provides the employee with peace of mind because they know someone is monitoring their safety and can respond quickly and accurately if they need assistance.

Any employee who works or travels alone or enters a remote location could benefit from being equipped with StaySafe.

Certified application

As part of our CAP (Certified Applications Provider) programme, Inmarsat works with a number of application providers with the intention of ensuring that their applications are not only compatible with our network, but provide our network users with effective, customer-focused applications that offer genuine business benefits, whether they’re using the network for voice, broadband, machine to machine connectivity, or all three. Only individual applications approved by Inmarsat are endorsed with the Inmarsat Certified logo.
