AescuLink

Worldwide 24/7 on-board telemedicine care

AescuLink is a real-time international on-board telemedicine service, providing expert medical response within a maximum of two minutes.

On the ocean, the next doctor may be thousands of miles away.

In the event of an emergency, what are the Master’s options? Approach the nearest port, or request evacuation by ship or helicopter? Both options waste time that could be crucial for the patient and vessel owner.

Medical treatment on board is possible, but often medical knowledge and instruments are missing.

AescuLink is purposefully designed to handle medical emergencies on large vessels.

Vital parameters are transmitted in real-time to the emergency care centre and a doctor is connected via video, to aid the patient on-board evaluate measures in real-time over the Inmarsat network.

Logistical decisions can be taken based on an exact medical diagnosis and lengthy and costly port diversions can be immediately avoided.
**Features**

- Real-time communication between patient, helper and physician
- Link with medical devices — ECG, Pulsoximeter, blood pressure
- Patient data and case reporting, documentation and archiving

**Advantages**

- Extremely easy to use - designed for use by medical laymen (ship officer and crew)
- Little training required
- Liability taken over by medical specialists on shore
- Guaranteed response in a maximum of two minutes
- Diagnostic/therapeutic instruction given by medical specialist
- Rescue coordinated with MRCC/IRCC, other TMAS and local hospital

**Certified application**

As part of our CAP (Certified Applications Provider) programme, Inmarsat works with a number of application providers with the intention of ensuring to that their applications are not only compatible with our network, but provide our network users with effective, customer-focused applications that offer genuine business benefits, whether they’re using the network for voice, broadband, machine to machine connectivity, or all three. Only individual applications approved by Inmarsat are endorsed with the Inmarsat Certified logo.

**Disclaimer**

Where an application provider’s application carries the Inmarsat Certified logo, it means that the application has been certified by Inmarsat to operate over Inmarsat’s satellite network. Certification does not mean that Inmarsat is certifying any system design or assumes any liability or responsibility in connection with the application provider’s application.

**About AescuLink**

AescuLink is a Global Health Care GmbH service.

GHC was founded in 2001, as a spin-off of Charite University Hospital. Their mission is to give access to emergency medical assistance to remote locations, particularly where no doctor may be physically present. The assistance provided shall be of the highest standards, in cooperation with Charite and other leading hospitals.
