

I-3 to I-4 migration update: POR to APAC completed for Classic Aero, Fleet 77, Swift 64 and Inmarsat C services

29 August 2018

Dear Inmarsat Partner and Customer

Further to our previous notifications on the Classic Aero, Fleet 77, Swift 64 and Inmarsat C (to include Aero C and Mini C) services migration, Inmarsat is pleased to confirm that all services were migrated from the Pacific Ocean Region (POR) I-3 satellite to the Asia/Pacific (APAC) I-4 satellite, as planned, on 29 August 2018 starting at 06:00 UTC.

We are continuously monitoring our systems to ensure services have been restored to normal levels and will provide further details where necessary throughout the post-migration phase.

Additional information about the overall migration can be found on the Inmarsat website www.inmarsat.com/i3-i4-services-migration.

If you have any questions or concerns, please contact Inmarsat Global Customer Support (globalcustomersupport@inmarsat.com), who will be able to assist.

Kind Regards

Inmarsat
