

# I-3 to I-4 migration update: IOR completed for Classic Aero, Fleet 77, Swift 64 and Inmarsat C services

12 December 2018

Dear Inmarsat Partner and Customer

Further to our previous notifications on the Classic Aero, Fleet 77, Swift 64 and Inmarsat C (including Aero C and Mini C) services migration, Inmarsat is pleased to confirm that all services were migrated successfully from the Indian Ocean Region (IOR) I-3 to the Europe/Middle East/Africa (EMEA) I-4 satellite today.

We are continuously monitoring our systems to ensure services have been restored to normal levels and will provide further details where necessary throughout the post-migration phase.

Additional information about the overall migration can be found on the Inmarsat website [www.inmarsat.com/i3-i4-services-migration](http://www.inmarsat.com/i3-i4-services-migration).

If you have any questions or concerns, please contact Inmarsat Global Customer Support ([globalcustomersupport@inmarsat.com](mailto:globalcustomersupport@inmarsat.com)), who will be able to assist.

Kind Regards

**Inmarsat**
