

I-3 to I-4 migration programme completion: all ocean regions successfully migrated

12 February 2019

Dear Inmarsat Partner and Customer

Following the successful completion of the fourth and final regional migration (IOR -Indian Ocean Region) of the Inmarsat legacy services (Classic Aero, Swift 64, Fleet 77 and Inmarsat C) from the I-3 satellites to the I-4 constellation on 12 December 2018, Inmarsat is pleased to announce that the overall migration programme has now been concluded.

We would like to take this opportunity to thank all our partners for their outstanding support and contribution towards the success of this migration. Also our thanks to all our customers for their patience and understanding during the period while the services were transitioned.

Further information about the overall migration will be kept available on the Inmarsat website www.inmarsat.com/i3-i4-services-migration.

Inmarsat remains committed to supporting the legacy services on our network and will continue to monitor service availability as part of our routine operational task management.

If you have any questions or concerns, please contact Inmarsat Global Customer Support (globalcustomersupport@inmarsat.com), who will be able to assist.

Kind Regards

Inmarsat
